Phone: +91-9654258060 | Email: ukandpal2@gmail.com | LinkedIn: [linkedin.com/in/udaykandpal](https://www.linkedin.com/in/udaykandpal)

PROFESSIONAL SUMMARY

Accomplished Java backend architect with 10+ years of experience designing high-performance distributed systems, enterprise integrations, and scalable banking and telecom platforms. Skilled in establishing IT governance frameworks, enterprise architecture standards, and data architecture strategies for mission-critical financial services and telecom environments. Proficient in Java, Spring Boot, Microservices, Apache Kafka, Hibernate, RESTful APIs, and CI/CD automation. Proven technical leader managing 20+ engineers delivering mission-critical solutions aligned with enterprise architectural frameworks.

SKILLS

Backend Engineering & Architecture: Distributed Systems, High-Performance Backend Solutions, Event-Driven Architecture, Core Java, Advanced Java, Spring Boot, Hibernate, Java EE, J2EE, RESTful APIs, Design Patterns (Singleton, Factory, Strategy, Builder), Data Structures, JavaScript (5 Years), Microservices

Enterprise Integration & API Management: Enterprise Integration Patterns, Enterprise Integration & API Management, Scalable Integration Solutions, Apache Camel (EIP), IBM MQ, Apache Kafka, API Governance

Data Architecture & Analytics: Apache Spark (RDD), Data Architecture & Analytics, Cassandra, Oracle Database, SQL, Relational Databases, Data Ingestion, Data Cleansing, Data Transformation, Database Query Optimization, Caching Strategies

Cloud Architecture & Infrastructure: Cloud Architecture & Strategy, Zero-Downtime Deployment, OpenShift, Docker, Kubernetes, AWS, Microsoft Azure, DevOps, CI/CD Orchestration, Jenkins, GitLab, Bitbucket, Production & DR Environments, Infrastructure Monitoring

Enterprise Architecture & Governance: Enterprise Architecture Frameworks, Stakeholder Management & Governance, IT Governance, Regulatory Compliance, Architecture Reviews, Technical Roadmaps, Zero Trust Security

Leadership & Engineering Practices: Team Leadership (Managed 20 Engineers), Agile / Smart Sprint Management, Technical Leadership (5+ Years), Technical Mentoring, Technical Recruitment, SDLC, Debugging

Domain Expertise: Multi-Country Fee Management, Banking Solutions, MMSC, Core Banking Infrastructure, Telecom Integrations

PROFESSIONAL EXPERIENCE

Cognizant | Senior Associate

Bangalore, India | March 2026 - Present

- Direct the configuration and deployment of critical product catalogs, banking services, equipment profiles, and intricate fee schedules, leveraging in-depth knowledge of banking domain standards.
- Lead a cross-functional engineering team using smart sprint management practices to deliver scalable banking solutions for a prominent US-based financial services client.
- Establish and enforce IT governance standards across banking platform delivery, ensuring adherence to enterprise architecture frameworks and regulatory compliance requirements.
- Coordinate delivery priorities across banking configurations and core infrastructure activities, aligning technical execution with client-specific operational requirements and stakeholder expectations.
- Apply senior-level ownership across team delivery, banking configuration, infrastructure oversight, and cross-regional execution for complex financial services environments.
- Oversee multi-regional banking fee configurations and critical fee structures, including MMSC charges, across European markets including Poland, Germany, and the United Kingdom.
- Implement strict infrastructure monitoring and end-to-end management protocols across core banking environments to maintain high platform availability and operational resilience.

Infosys | Consultant

Bangalore, India | February 2024 - February 2026

- Spearheaded global technical roadmaps across US and India-based teams, aligning complex telecom offerings with long-term client strategic goals and enterprise architecture principles.
- Managed full-cycle technical recruitment, evaluating profiles, conducting technical interviews, and onboarding talent aligned with client and project delivery standards.
- Architected and implemented robust enterprise integration solutions using Java, Spring Boot, Apache Camel (EIPs), and IBM MQ, supporting 10 million daily transactions with 99.99% delivery success.
- Directed a cross-functional team of 20 engineers in the end-to-end delivery of mission-critical projects for a leading US telecom provider, ensuring on-time delivery across 4 consecutive major releases.
- Managed stakeholder engagement and governance across multi-geography teams, driving alignment between technical delivery and business objectives at the senior leadership level.
- Modernized system architecture by building scalable microservices and standardizing integration patterns using enterprise architecture frameworks, reducing system fragmentation and cutting development turnaround for new integrations.
- Drove operational excellence by mentoring engineering staff and conducting Agile coaching, improving team velocity and establishing consistent, reusable orchestration patterns.
- Designed data architecture strategies for high-volume telecom data processing leveraging Cassandra and Oracle, enabling analytics-ready data flows and reducing integration errors significantly.

Tata Consultancy Services | IT Analyst

Noida, India | September 2021 - January 2024

- Spearheaded technical recruitment by evaluating 30-40 candidates and conducting up to 10 technical interviews monthly.
- Reduced manual deployment efforts, accelerated release velocity, and maintained 99.95%+ platform availability across 10+ microservices.
- Architected the refactoring of a legacy data processing module by optimizing data access patterns and introducing strategic caching mechanisms.
- Supported client architectural reviews, designing scalable decision-making models for retail banking while ensuring strict regulatory adherence and data integrity.
- Built resilient CI/CD pipelines utilizing Jenkins, GitLab, and Bitbucket, orchestrating zero-downtime deployments to OpenShift Production and Disaster Recovery (DR) environments.
- Engineered autonomous Java Spring Boot microservices and Apache Spark (RDD) data pipelines for a premier European bank, processing over 200GB+ of daily financial data (currency rates, MRE).

CL Educate Ltd. | Senior Executive

Delhi, India | February 2019 - September 2021

- Architected and maintained 200+ RESTful APIs for the 'aspiration.ai' platform, supporting over 200,000 active users across web and mobile ecosystems.
- Developed an optimized Java parsing engine that reduced question paper processing cycles from 120+ hours to under 5 minutes, significantly automating publishing workflows.
- Established comprehensive monitoring, centralized logging, and proactive error-handling mechanisms to elevate API reliability and maintainability.

Navyug Infosolutions | Software Engineer

Noida, India | June 2018 - February 2019

- Transitioned legacy monolithic components to microservice-ready architectures, cutting system downtime by 50% and enhancing architectural scalability.
- Engineered backend services for the Zaky application using Spring Boot, delivering secure, maintainable, and high-throughput REST APIs.
- Profiled and optimized database queries to efficiently sustain rapid user traffic growth.

Adobe India Pvt. Ltd. | Software Engineer

Noida, India | June 2016 - January 2017

- Collaborated with geographically distributed product teams to enhance cross-functional engineering processes and deliver quality releases.
- Executed regression testing, defect validation, and test automation initiatives for Adobe FrameMaker, improving release stability and cycle time.

IBM | Technical Analyst

Noida, India | July 2015 - May 2016

- Conducted system analysis, health checks, and performance monitoring for high-volume enterprise platforms, ensuring operational continuity and minimizing downtime.
- Applied process optimization techniques to improve incident turnaround times and service delivery standards.

IRCTC | Intern

June 2014 - July 2014

- Participated across the full Software Development Life Cycle (SDLC), implementing coding standards and collaborative version control practices.
- Developed a web application module utilizing Java EE, enhancing core system functionality and end-user workflow efficiency.

NEC Technologies India Ltd. | Trainee / Apprentice

Noida, India | July 2013 - August 2013

- Gained hands-on experience in Content Management Systems (CMS) and Learning Management Systems (LMS).
- Explored Moodle.org architecture to design and optimize e-learning platforms, enhancing digital learning experiences and system workflow efficiency.
- Collaborated with engineering peers and mentors across structured technical problem-solving sessions, strengthening core software engineering fundamentals.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Jaypee Institute of Information Technology (JIIT) | 2015

CERTIFICATIONS

- Introduction to Cyber Security in SDLC** - Infosys (Credential ID: X3RROAJSN6, 2024)
- Privacy by Design: Beginners and Intermediate** - Infosys (Credential ID: QN6SRHEPSA, 2024)
- Oracle Certified Professional: Advanced Java** - NIIT Technologies (2014)
- Google Cloud Foundations** - LinkedIn Learning (2024)
- Introduction to Prompt Engineering for Generative AI** - LinkedIn Learning (2024)

HONORS & AWARDS

- Global Coding Ranking** - Ranked 432 globally in CodeChef Challenge
- ACM ICPC India National Finalist** - Top-tier algorithmic achievement
- Hackathons & Competitions** - First Place, KNUTH Hub Intra-College Coding Competition
